366, 366A, 367, 371, 469, 546, 586, 590, 624, 628, 629, 639, 640, 641, 642, 649, 653, 679

French Provincial (Suggested):

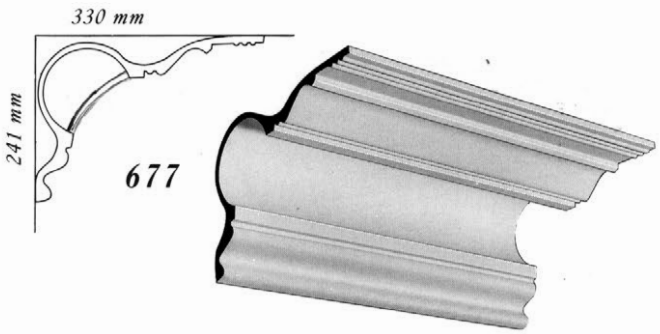

321, 485, 488, 709, 710, 716, 727, 909, 960

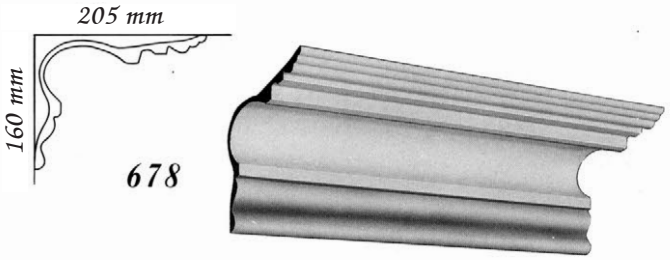

Georgian Style (Suggested):

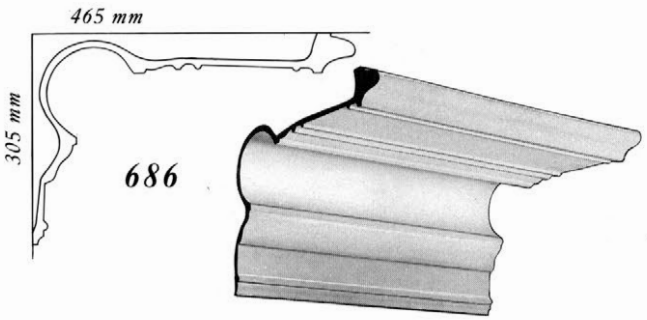

202, 221, 252, 366, 366A, 587, 642

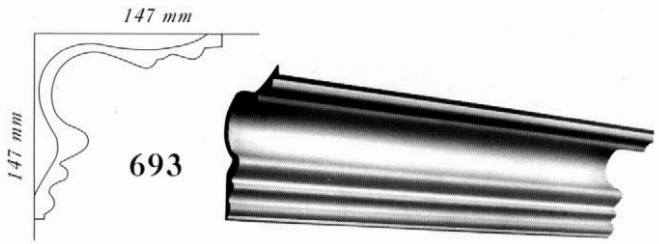

HOPKINS PLASTER STUDIO

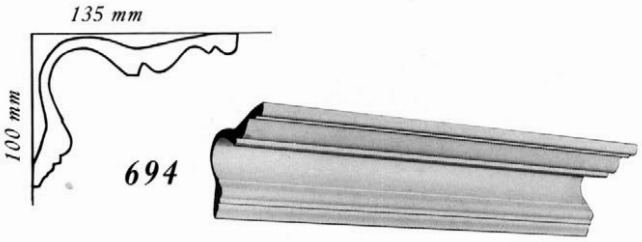

Victorian Coves

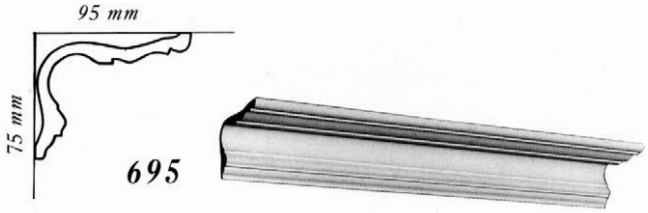

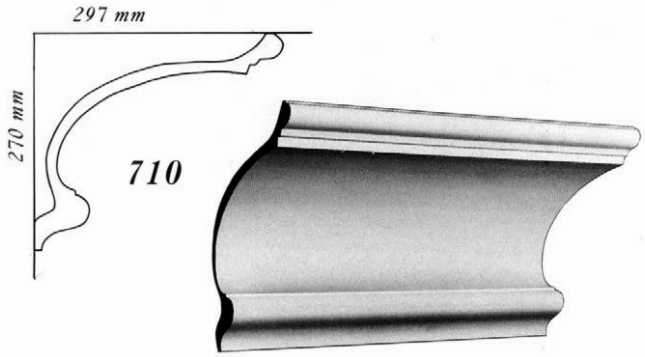

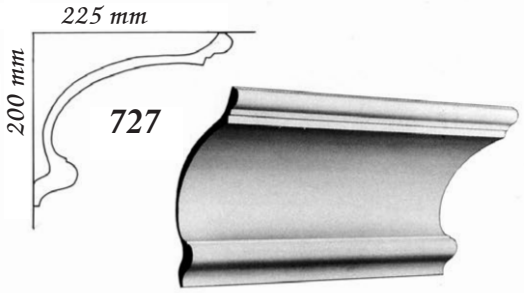

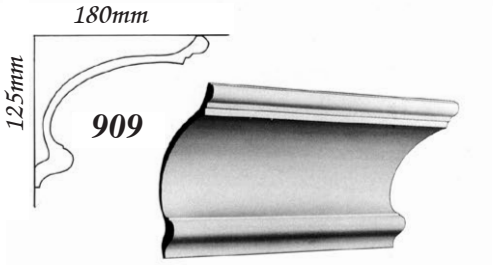

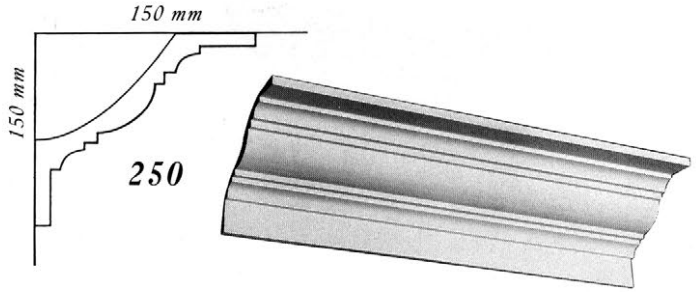

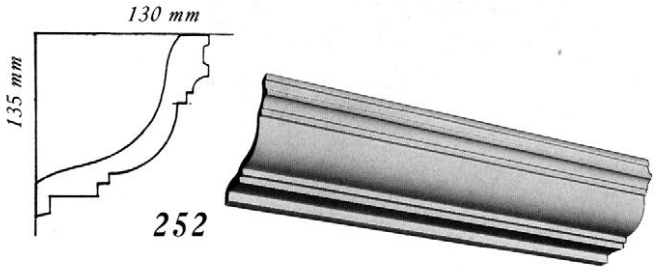

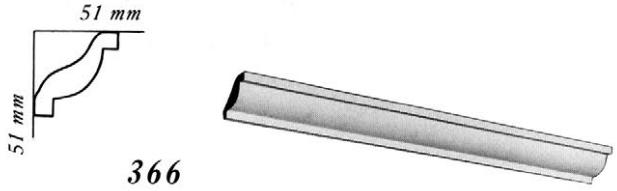

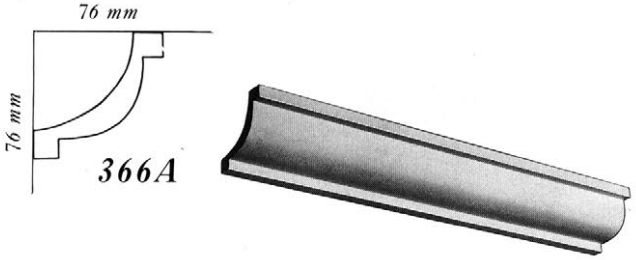

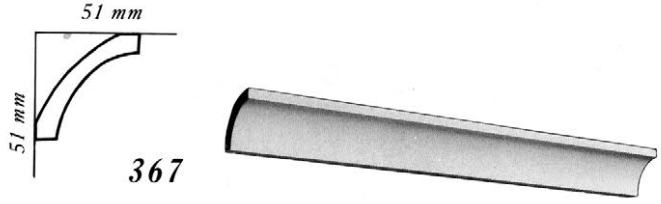

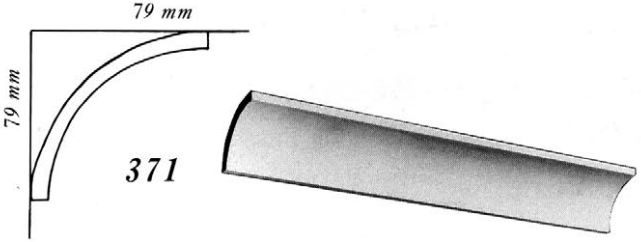

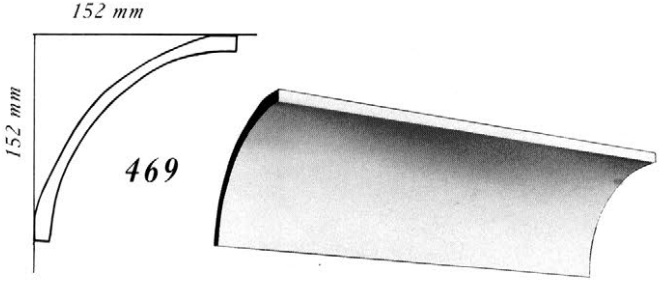

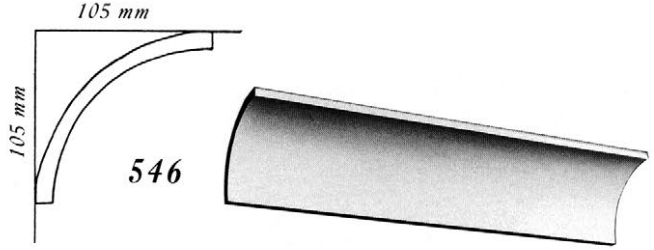

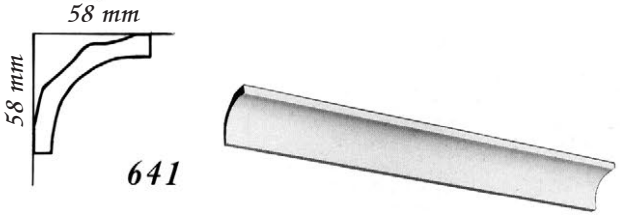

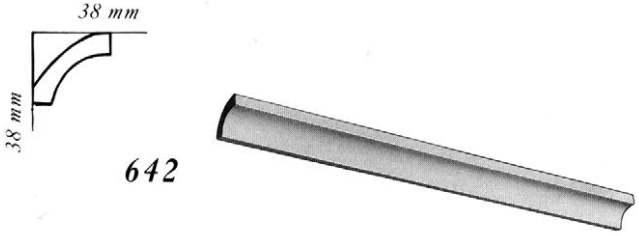

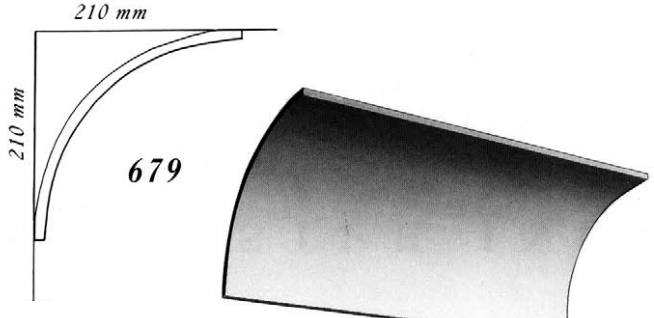

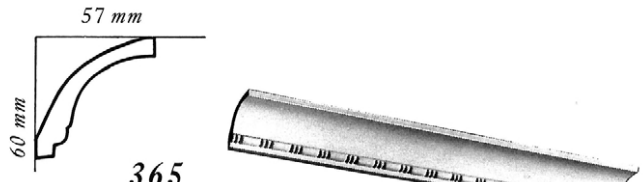

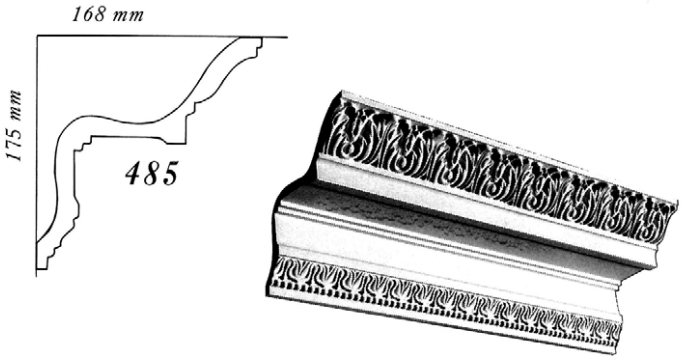

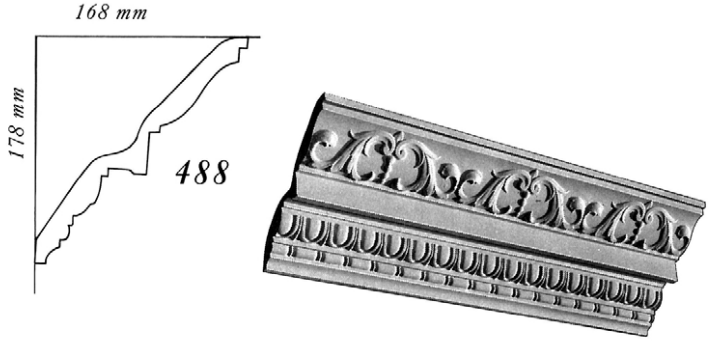

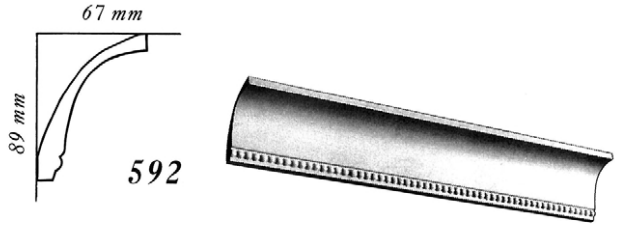

Your wall to ceiling joints are on display 100% of the time for the entire life of your home. So you shouldn't skimp on cornices.

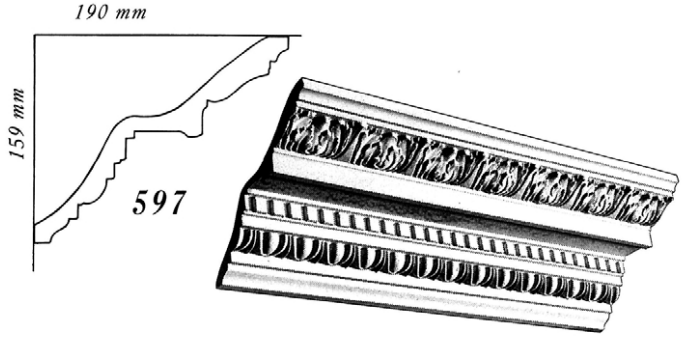

Egg & Dart, Bead & Reel, Acanthus leaf

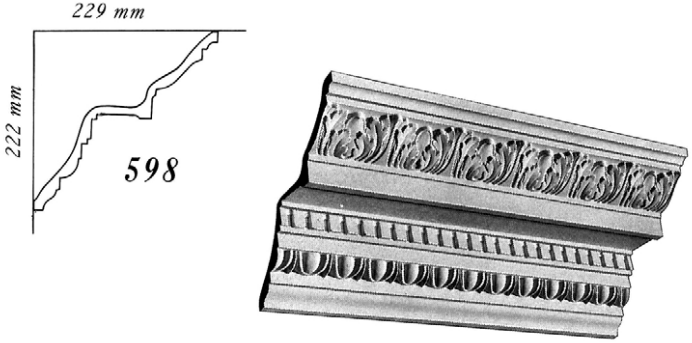

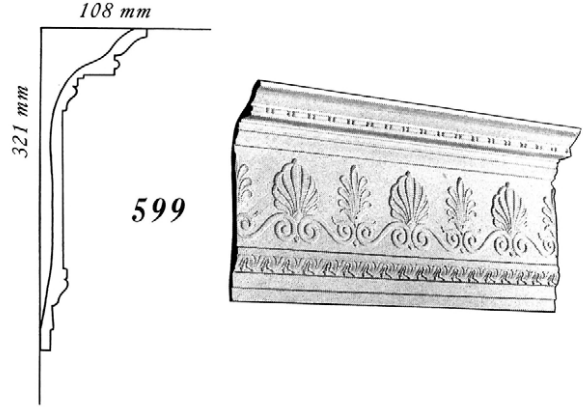

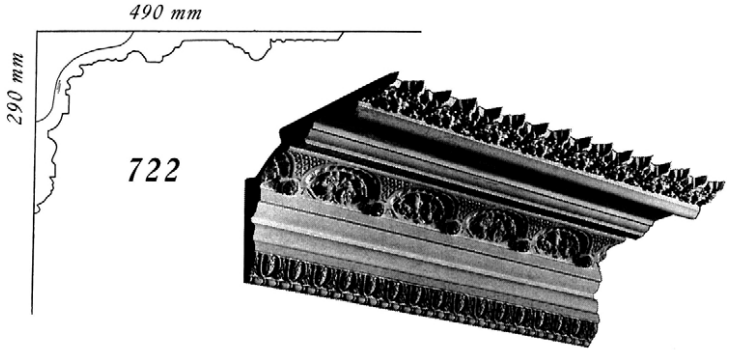

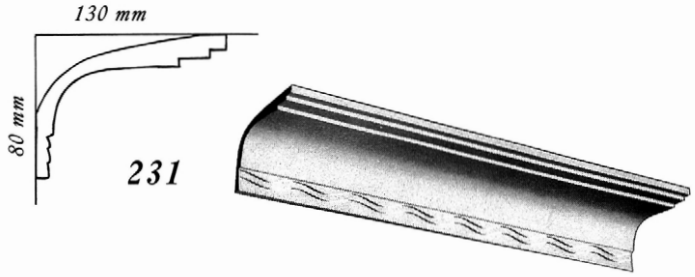

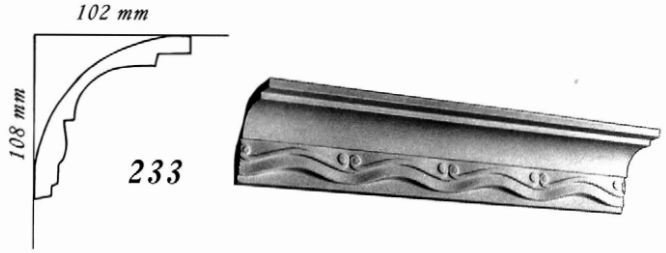

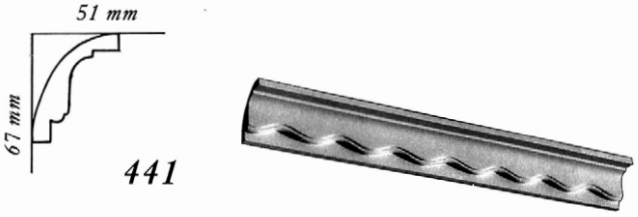

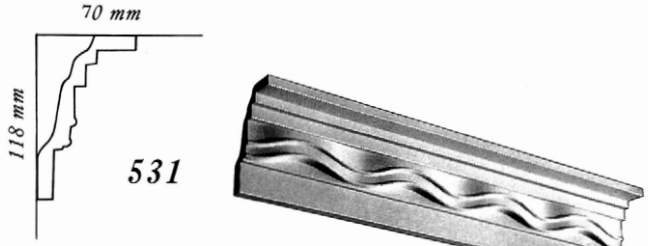

Other cornices with Egg & Dart, Bead & Reel or Leaf enrichments include:-

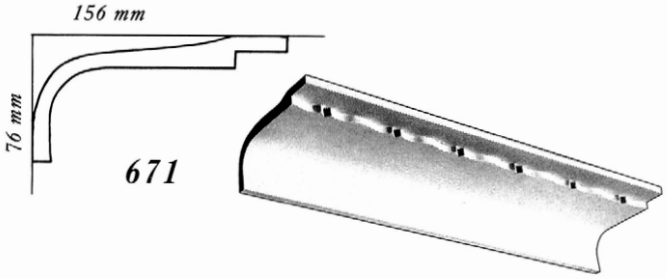

319	*406*	*592*	*612*	*614*	*673*
676	*676A*	*687*	*696*	*699*	*700*

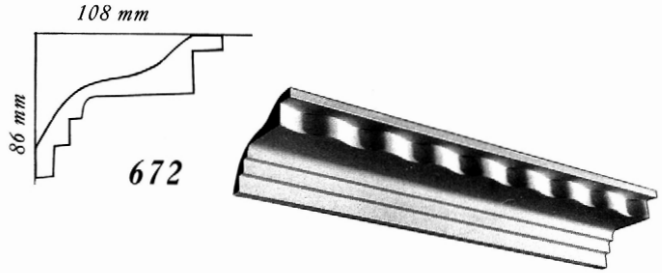

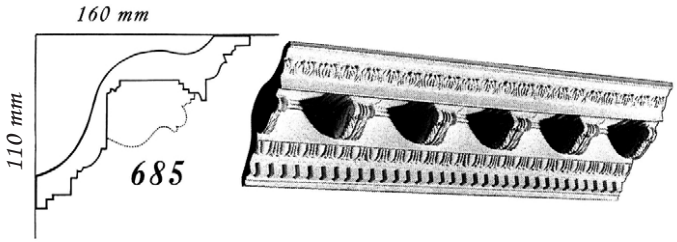

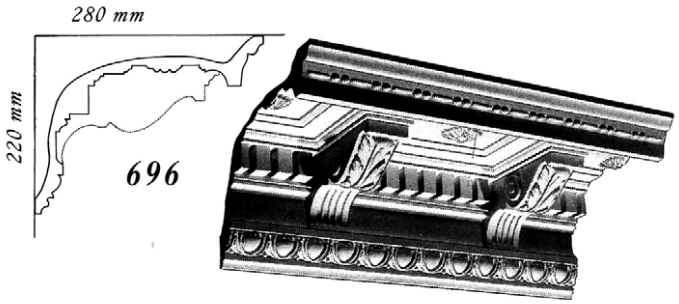

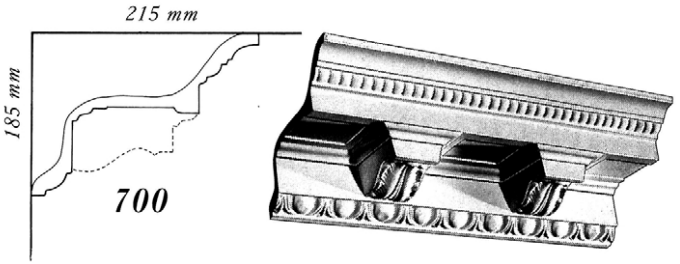

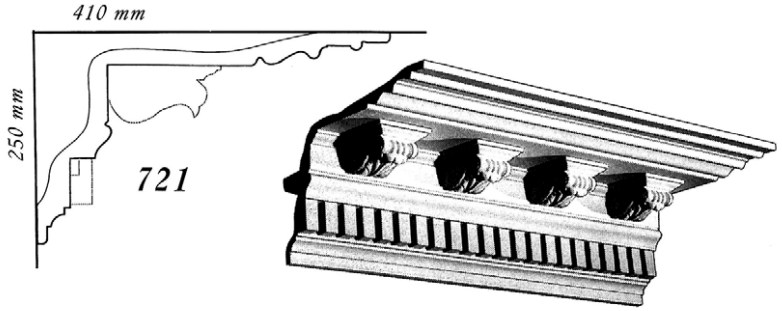

Installation - Cornices are easy to fix with plaster based adhesive, ie. cornice adhesive.
The adhesive is highly satisfactory both as an adhesive and for finishing of joints so only one material is needed.

MODILLION

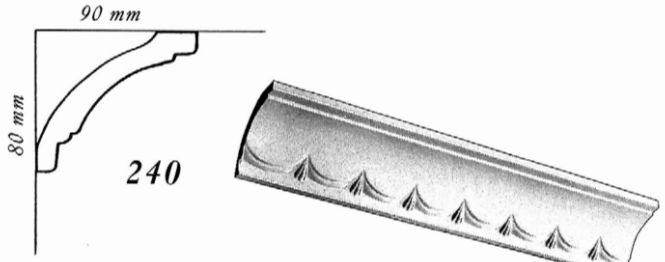

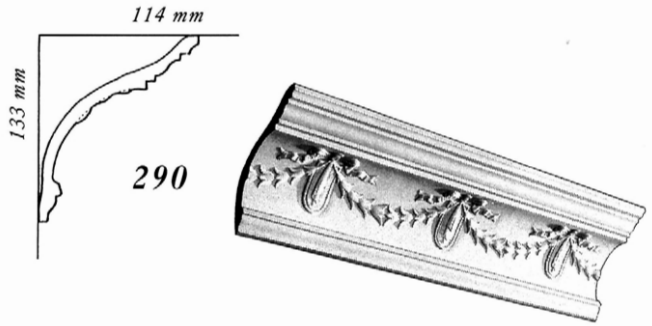

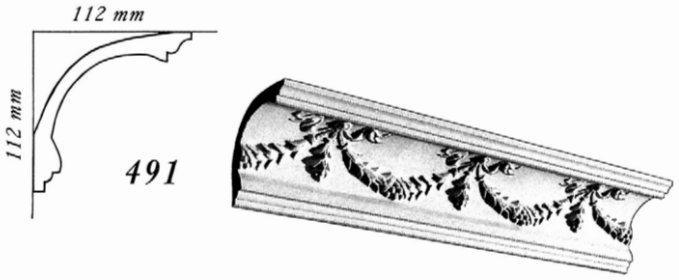

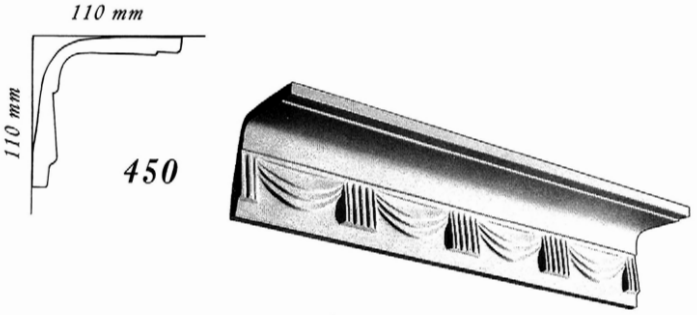

Note on Modillion and other cornices with a pattern repeat.
Cornices #696, 685, 700, 290, 612, 688, are examples of those with a pattern repeat dimension.
As with tiles or wallpaper, a little planning is needed to get the best layout.
Ask our sales office for details.

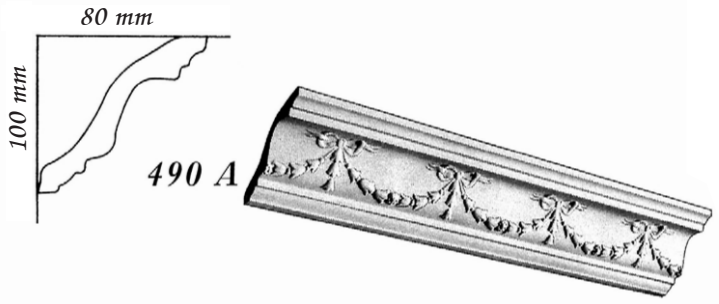

Plaster will not burn - in fact, it contains chemically bound water which is the reason why it is used as a fire rated material. It does not emit smoke or toxic fumes. It is a four zero early fire hazard warning material - that is the best possible rating.

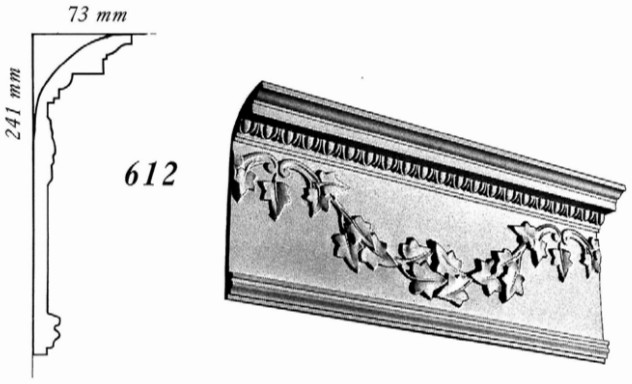

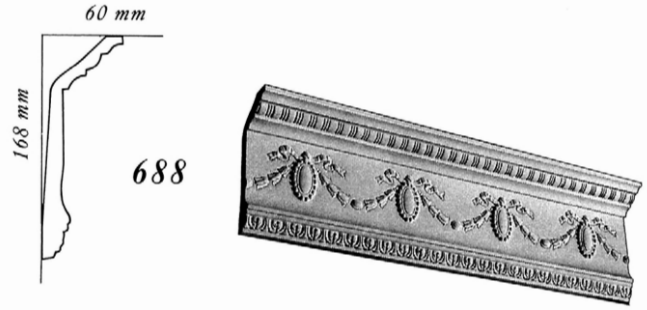

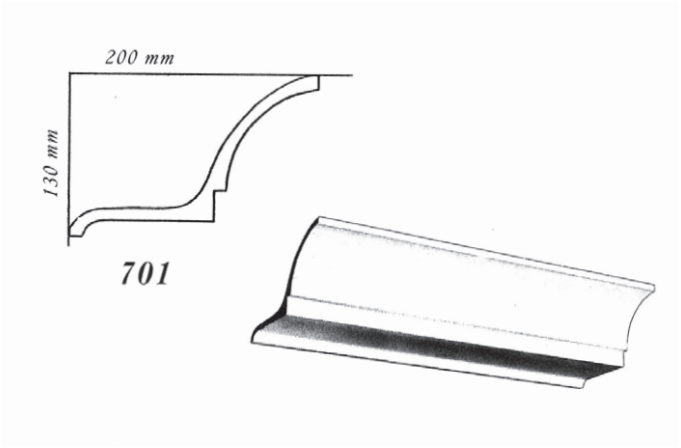

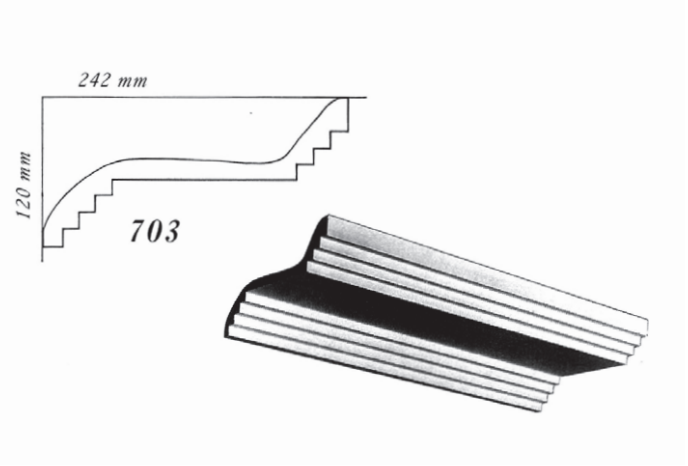

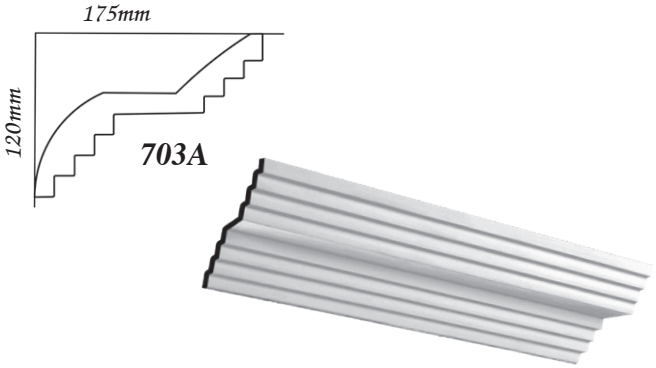

We have a range of cornices which can be installed over existing small cornices.
Some cornices match ceiling roses and domes.

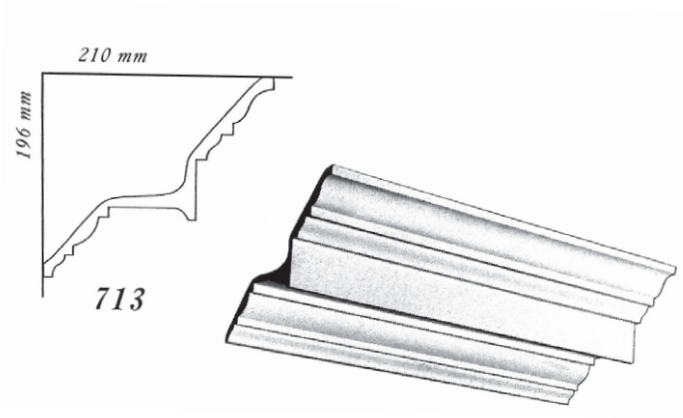

Sprinkler

Sprinkler cornices perform a dual function. Sprinkler pipes and / or cables can be housed within the cornice.

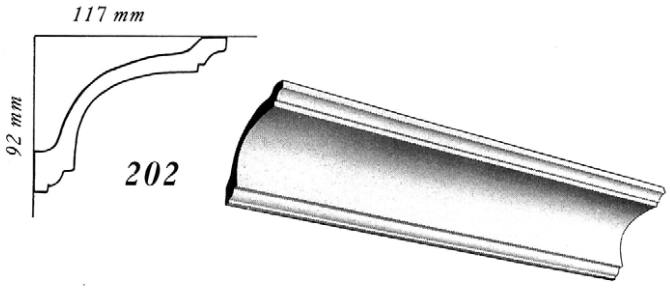

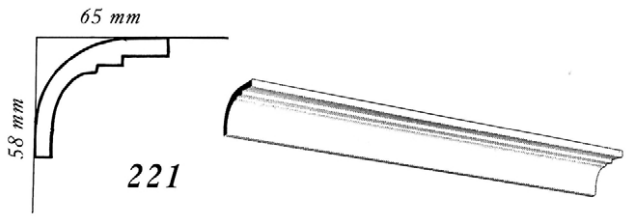

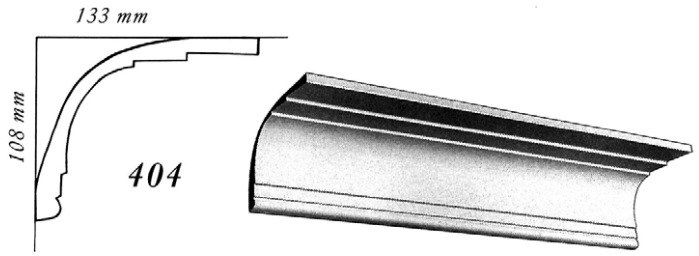

When you buy HPS cornice, what you buy today won't be out-of-style tomorrow. Buying HPS is like buying good furniture: both last a life time and beyond. That's why HPS makes the difference.

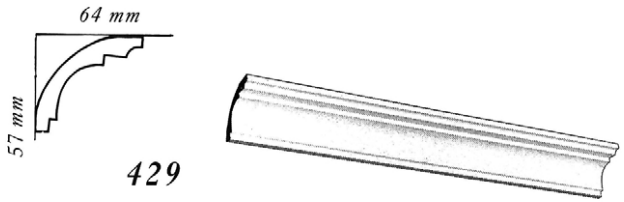

The Hopkins Plaster Studio range of standard cornices is huge but we find we are still asked to replicate old cornices and this is an important part of the business.
We make theses cornices either from a sample brought in or by measuring or taking an impression on site.
Some custom designed cornices are so large that they need to be installed in sections.

Gypsum plaster cornices are inert and are not attacked by any organism.
They are normally dimensionally stable, yet can creep to accommodate frame movements and so lessen the likelihood of cracking.

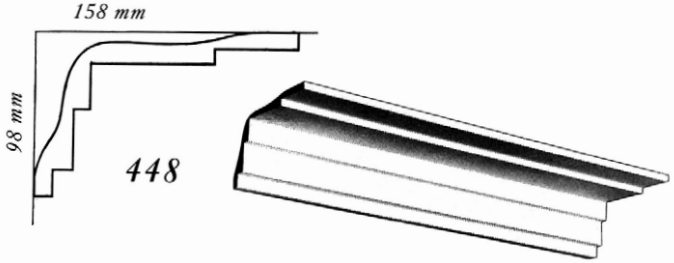

Plains with Square Corner

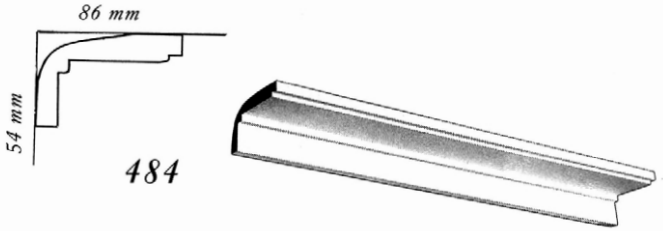

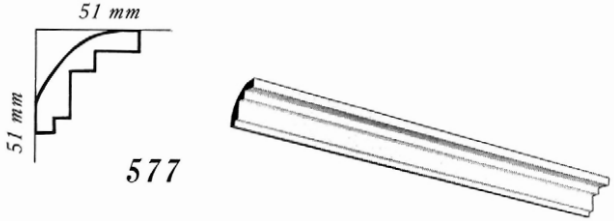

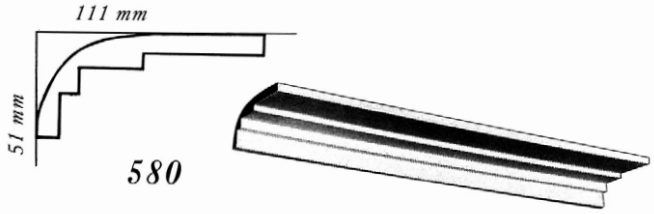

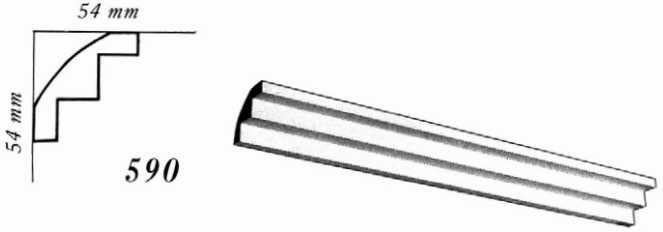

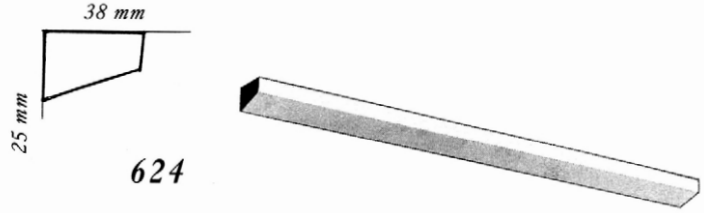

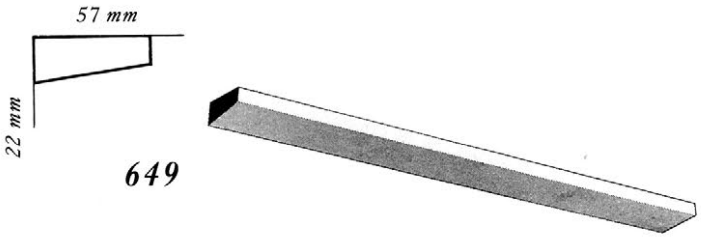

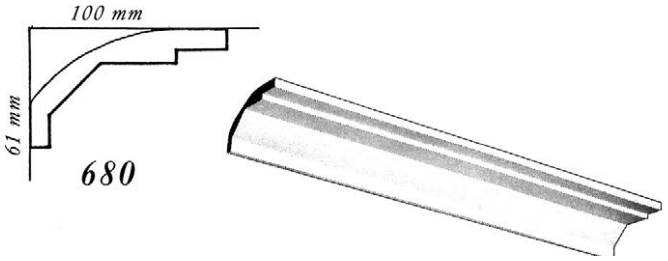

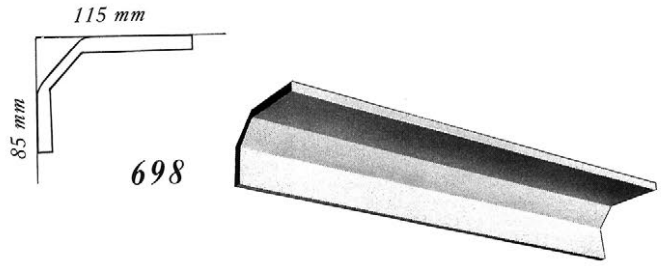

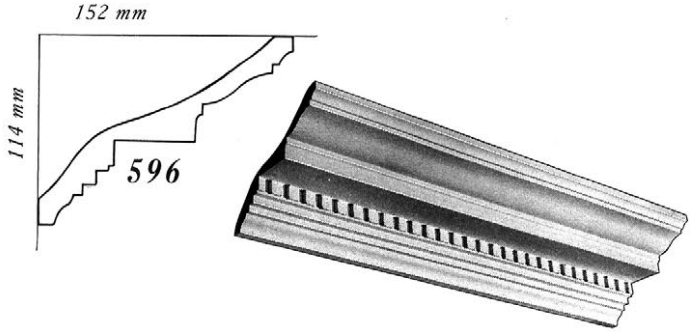

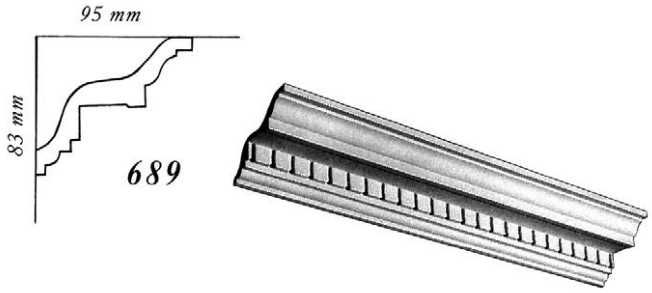

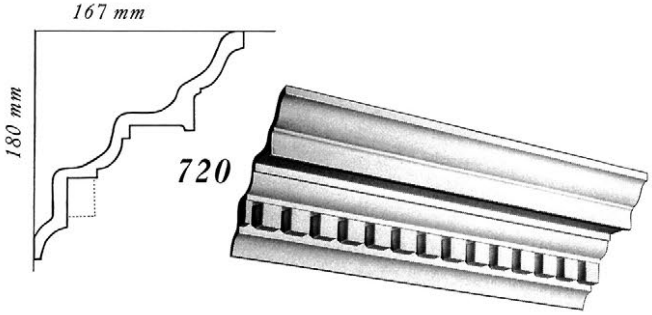

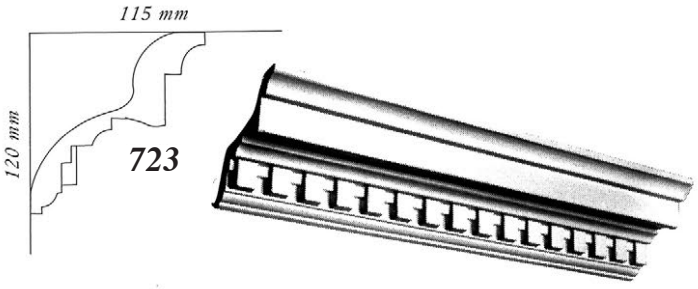

DENTIL

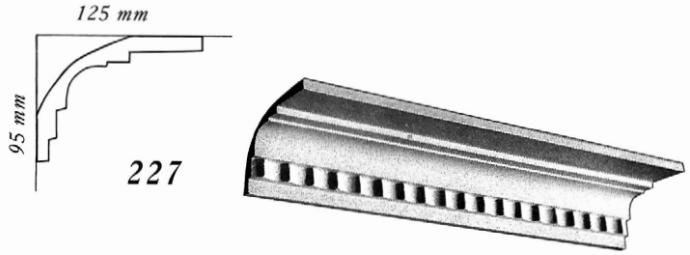

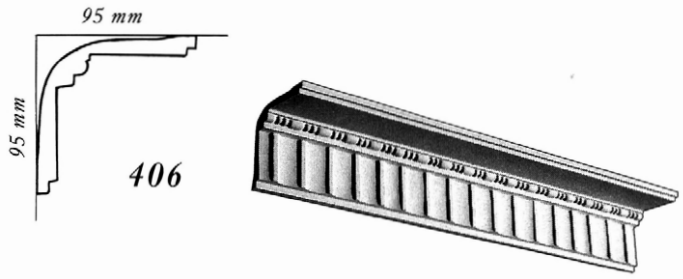

Other cornices with Dentils include:-

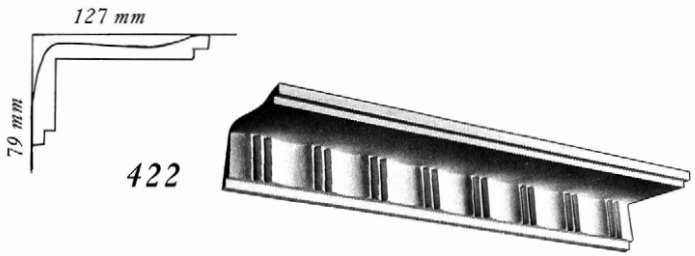

321	*596*	*597*	*598*	*651*	*685*
696	*700*	*720*	*721*
